Awards galore for Avighna India

THE HSBC SPONSORED International Property Awards held in Kuala Lumpur, Malaysia saw Avighna India being commemorated with five prestigious awards. A high profile gala dinner was followed by the awards ceremony and was attended by the top firms in all respective fields — development, architecture, and interior design. In order to maintain the highest standards, the judging panel consisted of a wide range of top industry professionals.

Avighna India's eagerly awaited development in Lower Parel — One Avighna Park was awarded the 'Best Residential High-Rise Development' in the entire Asia Pacific region. The Asia Pacific competition was between developers from 23 countries including Australia, New Zealand, China, Singapore, Malaysia and Thailand. The development was also awarded the 'Best Apartments', 'Best Redevelopment' and 'Best Architecture' in India.

Avighna India Ltd has made a strong foray into the real estate sector with a string of landmark developments. One Avighna Park has offered a long term sustainable solution for water — treatment of sewage water to be used in areas where maximum water is consumed, thereby reducing water consumption by a great deal. Nishant Agarwal, Managing Director, Avighna India says, "We feel great pride in what we do and this accomplishment and recognition will fuel us to do even better. The International Property Award is the most prestigious award and for a development in India to win it, really changes the notion of what India has to offer in the coming decade. Winning this award is indisputable evidence that One Avighna Park will be one of the finest addresses to live in Asia."

One Avighna Park is spread over seven acres and will include a 64-storey luxury residential tower, a commercial and hospitality tower.
